FOREWORD

The population data shown in this report are based on records of residents registered with Manitoba Health as at June 1, 1999.

Data for the regions include population of cities, towns, villages, rural municipalities, local government districts, and unorganized territories. It should be noted that villages and towns are separately identified if these are incorporated. If unincorporated, the population counts are included in the rural municipality in which these are located.

Population for small areas (for example, a rural town) can be biased because the mailing address may be reported as the place of residence. An individual residing outside the town, but having a mailing address there, may be counted as living within the town. This bias in the population figures is reduced as the catchment area increases. Thus, regional estimates are not significantly affected by the mis-classification bias. Fluctuations from year to year for these small areas might also be affected by changes to mail delivery locations assigned by Canada Post.

The type of place indicates First Nations, unorganized territory, and municipal status of incorporated places (city, town, village, rural municipality, and local government district). The following list indicates the abbreviations used for types of places:

C	City
FN	First Nation Band
IC	Inner City
LGD	Local Government District - a designated area having no local government; administered by the province through a resident administrator.
M	Municipality
R.H.A.	Regional Health Authority
RM	Rural Municipality
T	Town
UT	Unorganized Territory - an area with no local government or resident administrator.
V	Village

Population Changes

The purpose of this section is to highlight changes in the population of Manitoba. Changes are determined by comparing the registration file for the current year to that of the previous year. A file is created for additions (residents on the current file but not on the previous file) and one for deletions (residents on the previous file and not on the current file). After determining reason for coverage or cancellation, those coded as deaths, births and other(1) are separated, leaving only arrivals and departures. The deletions are subtracted from the additions with a resulting net migration.

Figures 2a, 2b, and 2c are bar graphs illustrating resident profiles by single year of age for residents who were active on the registration file on June 1, 1999. Figures 2b and 2c are female and male profiles.

Figures 3a, 3b, and 3c depict the actual number of residents cancelled from the registration system upon notification of death during the period June 1, 1998 to June 1, 1999. Figures 3b and 3c are female and male profiles.

Figures 4a, 4b, and 4c represent population migration. In-migration and out-migration with a resulting net migration trend line are depicted. Manitoba gained population through in-migration between June 1, 1998 and June 1, 1999. There were 19,742 in-migrants and 16,672 out-migrants resulting in a net in-migration of 3,070. Figures 4b and 4c are the female and male trends.

(1) Member of the Armed Forces, inmate of a penitentiary, or not located.

Figure 2a
Manitoba Health Population by Single Year of Age, June 1, 1999

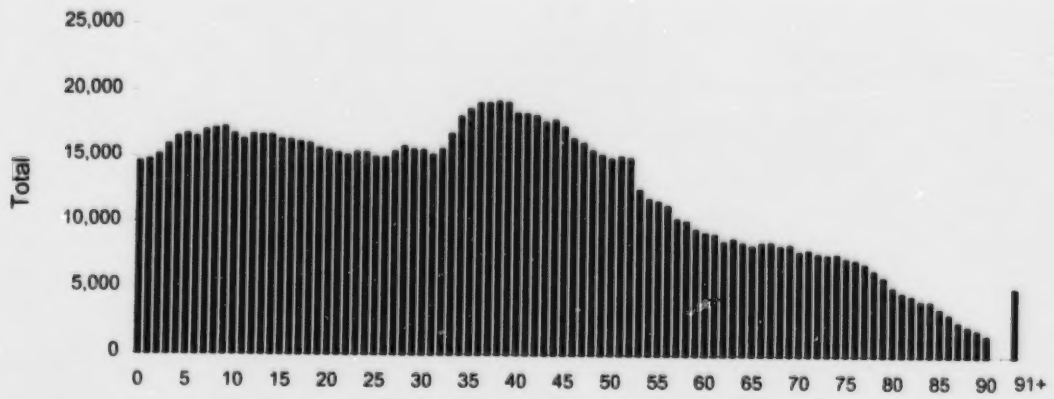

Figure 2b
Manitoba Health Female Population by Single Year of Age, June 1, 1999
